Problem Statement

Analysis of 360 orders across FY 2022–23 reveals that West region contributes 40% of revenue but faces the longest average delivery time (4–5 days), while a 0.52 return rate and seasonal revenue volatility (₹95K low to ₹160K peak) indicate structural risks in demand and fulfillment management.

Key Insights & Recommendations

Insight 1: West leads revenue ⚠️
₹15.3L revenue but high discounts → possible lower profit

Insight 2: Revenue is seasonal 📉
Peak in 2023, sharp drop (~24%) in last quarter

Insight 3: Electronics drives volume 📦
Highest orders but lower revenue per unit

Insight 4: Channel mix is balanced 🔄
Online + Marketplace ≈ Store contribution

Insight 5: Delivery delay risk 🚚
West has highest delivery time but still high revenue
